

Lithuania

The fifth meeting of Comenius Project took part in Alytus, Lithuania. I was one of the lucky guys who could go. We worked a lot before the trip, so it was a big relief when the day came. Personally, I was looking forward it very much, although I was afraid of planes. When I was younger I decided that I would never travel by plane. Guess I was wrong. But after the first flight- which was hard, long and scary- I realised, that it wasn't that bad, indeed I started enjoying it. And it gave spectacular view from the plane. The most wonderful and interesting was flying above the white clouds under the blue sky, it was amazing.

First we arrived at Riga where we waited 4-5 hours for the next flight. During that time we were sleeping, relaxing and sleeping... Soon we finally flew to Vilnius, where a bus picked us up and drove to Alytus. Then everybody went to their accommodations. I was living with a family. I've already known the boy I was living with, we became friends when they came to Hungary.

The first day we visited the school. It is very big with much students. There are many things to learn in the school: hairdressing, even how to build walls. Then the school and the head teacher welcomed us and we saw a production too. Later we visited Vilnius, the capital city again. Well, for me big cities are not interesting, but it was nice.

The second day we started in school again. We, girls went to the hairdresser's and could have our hair made. After that we tried to make a heart at the florist's. In the afternoon we went to Trakai where we saw a castle built on an island. This place was beautiful especially the frozen lake surrounded. In the evening we went for a big walk. It was tiring but we had fun together. The last day we watched videos made by the different countries and we voted which was the best. Then we visited Alytus. In the evening there was a cocktail party. Singing, dancing, food...

I recognised two main differences between Lithuania and Hungary. There the weather is much colder. Every lake was frozen. And the other was the food. It seems to me that they eat healthier than us. They eat more vegetables and salads. Sometimes we met some interesting and strange food. It was funny: stupid Hungarians watching food like sheep. But it was delicious anyway.

On Saturday we had to leave. But if trouble doesn't happen first, I will later... We were waiting for the bus which was supposed to take us to the airport but the organisers believed that we would leave the next day, so the bus driver was sleeping... After a thousand phone calls the bus came. Fortunately we caught the plane, I said goodbye to my friend and flew home.

This trip was an amazing experience in my life. I got to know other students from other countries. I was lucky to meet those Lithuanian guys again I got to know in Hungary. We had much fun together. They will always stay in my heart.
