

Secondary Technical School of Energetics

„ESZI“

The country's first undertaking school opened in 1986
maintained by the NPP of Paks.

The teaching system of the ESZI has a wide variety of studies. We make preparations to branches of studies that easy-to utilize, and give you high-quality knowledge.

Here the studies are in medium-, and high-level. On the first step, the students can do their final examinations, then they can continue their studies in a higher level.

There are several branches of studies, such as Information Technology, Electronics, Mechanism, Protecting of the Enviroment, Economy and Management.

We also teaching foreign languages such as English and German at raised number of lessons.

For the students who are not from Paks, the school can guarantee a students' hostel for them. It can assure high-quality terms to study and rest. The students who are living in rooms which have three or four beds and a wash basin, have the opportunity to use the computer room, the fitness room, play pool billiard, having their time in the hall or do other free time activities.

In the sports hall, which have over 500 spaces, there are usually international sports events, concerts. The students also can use it for sports and other activities.

In the Students' Sports Community there are also football, basketball, volleyball and tennis sections for the students who interested in these

Exams and opportunities

The students have to do a final examination in their 12th class. After that they can go to university or stay back a year to have a professional school-year.

At the end of the 13rd and 14th year the students get a professional qualification and with that They will have the opportunity to get high-level jobs.

Continuation of studies

The secondary school want to fulfill the duty to prepare the students to their high-level continuation of studies. The schools results showing that it's one of the best secondary school of Hungary. The 60% of the students who qualified here got the opportunity to continue their studies in higher educations.
